ARMORED VEHICLES, AMBULANCES & SECURITY EQUIPMENT:

When residing/ working in war-prone regions, people have a major concern over their security aspects. In these cases, it becomes so important for a person to be confident about self-security and this confidence can be built using a variety of Personal Protective Equipment. CENTURY INTERNATIONAL specializes in supplying such types of Personal Protective Equipment which includes **Certified Armoured Vehicles** on the top of the list followed by other equipment which shall be listed later.

We can supply Armored Vehicles in various armouring levels like **B6, B7, VR6 and VR7** depending upon the requirement of the clients. However, we would like to mention here that VR armouring levels have an upper hand over B armouring levels in the sense that B-Level Armouring is done using Certified Raw Materials whereas in VR-Level the complete Armoured Vehicle itself is certified. In addition to this, VR-Level Armoured Vehicles are tested against AP-Mines, Hand Grenades and Shooting. Not only this, the VR-Level Armoured Vehicles have been certified in accordance with BRV 1999 (VR6) and the guidelines of the Federal German Criminal Department. After knowing this, it won't need any kind of expertise to determine which level provides better security. Nevertheless, we supply vehicles based on the clients requirement, but can also assure here that no matter what level is being manufactured, we take complete measures and follow full-proof procedures to ensure best-of-the-best quality armoured vehicles.

We also supply **Ambulances** with all basic facilities required for emergency situations. These Ambulances are custom-made as per clients' requirements by modifying **Toyota Land Cruiser** vehicles to install the features and facilities as requested by the clients.
